Biosimilar (anti-TNFs) in IBD

Steering Committee

Silvio Danese, Laurent Peyrin-Biroulet

Inflammatory bowel disease (IBD) including Crohn's Disease (CD) and Ulcerative Colitis (UC) are chronic diseases that significantly impact on patients' lives. Novel diagnostic and interventional techniques, imaging modalities and the introduction of biologics and small molecule have dramatically improved their management and outcomes.

The main aim of these webinars is to focus the attention of practicing IBD experts on the most novel imaging modalities, the use of new drugs, and how to integrate them in daily clinical practice.

Several interactive clinical cases will be presented and discussed to deliver the learning objectives.
