

BEST OF ECCO 2024

MARCH 14th, 2024 | h. 2:00 pm CET

The incidence of IBDs is growing in many countries in the world, especially among young people, and their impact on patient's quality of life is quite remarkable.

Though the management of IBD is constantly evolving, much remains to be done in order to spread best practices. ECCO Congress represents, as usual, the perfect occasion to go into basic science and traditional medicine in more depth, and to assist to clinical sessions by some of the world's top specialists; therefore, the main focus of this Webinar is to share the top line data presented at ECCO and to assess their impact in IBD clinical practice, so that knowledge and innovation can be disseminated and spread to all IBD centers in Italy.
