

IBD INNOVATION HUB

WHEN THE GOAL IS THE COMPREHENSIVE DISEASE CONTROL IN IBD

The management of chronic inflammatory bowel diseases (IBD) is evolving towards an approach that goes beyond symptom control, aiming for deep remission and the prevention of complications. This is made possible through new therapeutic approaches, personalized medicine, and innovations in clinical research. The program explores the most significant advancements in research and therapies, providing an up-to-date view on integrated treatment strategies. The goal is to improve the long-term quality of life for patients through a holistic and targeted approach.

5:00 pm

Welcome & Introduction

Silvio Danese, *Italy*

5:10 pm

Pushing boundaries in clinical research

Gionata Fiorino, *Italy*

5:30 pm

Crossing the line in Crohn

Silvio Danese, *Italy*

5:50 pm

Ulcerative colitis: aiming for the summit

Alessandro Armuzzi, *Italy*

6:10 pm

Dual acting: the roots of success

Franco Scaldaferri - Luca Antonioli, *Italy*

6:30 pm

Discussion *moderated by* Silvio Danese

7:00 pm

Conclusion

**DECEMBER
19TH, 2024**

5:00-7:00 PM CET

SCIENTIFIC DIRECTOR

Silvio Danese

Director, Gastroenterology and Endoscopy
IRCCS Ospedale San Raffaele, Milan, Italy
Professor of Gastroenterology
University Vita-Salute San Raffaele, Milan, Italy
